## Experience

### Octave Holdings & Investments

*Jr. AI Engineer*

**Alpharetta, GA**

*Aug 2025 – Present*

- Built agentic RAG pipelines using Gemini API embeddings with a **pgvector** store to extract and structure data from 10,000+ CRE lease documents, cutting deal-analysis time by 60%.
- Deployed a production lease-intelligence **microservice** on **GCP** (Cloud Run + Cloud Storage) with sub-second semantic retrieval across 500+ embedded documents.
- Designed few-shot prompt templates for 200+ structured fields per lease (rent, CAM caps, escalation terms), reducing hallucination rates by 40%.
- Implemented **Twilio SMS MFA** (user authentication) and hardened cloud infrastructure with monitoring to maintain 99.9% uptime for internal services.

### NCR Atleos

*Software Engineer Intern*

**Atlanta, GA**

*May 2024 – Aug 2024*

- Automated REST API functional test suites in Postman with **Azure DevOps CI/CD**, cutting manual QA effort by 400%; framework adopted across 3 teams.
- Built Logstash **CI/CD** pipelines with JFrog Artifactory and SonarQube quality gates, reducing deployment errors by 50% and release time by 2 days.

### Byju's

*Software Engineer*

**Bengaluru, India**

*Jun 2022 – Mar 2023*

- Developed 20+ RESTful **microservice** APIs in Node.js/Express.js integrated with CRM systems, reducing data-sync latency by 30%.
- Built 30+ marketing web pages in React.js serving 100K+ DAU with zero downtime over 9 months and 25% faster page-load times.

### HighRadius

*Technology Intern*

**Remote**

*Jun 2021 – May 2022*

- Built internal web tooling for 5+ enterprise accounts, improving UI performance by 30% and reducing manual onboarding steps by 20%.

## Technical Skills

**Languages:** Python, JavaScript, SQL, HTML/CSS

**Backend & APIs:** Python, Node.js, Express.js, Django, REST APIs, Microservices

**Frontend:** React.js, Next.js, JavaScript, HTML/CSS

**Cloud & DevOps:** GCP (Cloud Run, Cloud Storage, Vertex AI), AWS, Docker, CI/CD, Azure DevOps, JFrog Artifactory, Git

**Databases:** PostgreSQL (pgvector), MySQL, SQLite, MongoDB

**Testing & Quality:** Postman, Unit / Functional / Destructive / A/B Testing, SonarQube

**AI / ML:** LLMs, RAG, Prompt Engineering, Fine-tuning, RLHF, Federated Learning, CNNs, Transformers

**ML Frameworks:** LangChain, PyTorch, TensorFlow, Keras, Hugging Face, Gemini API, Pandas, NumPy

## Projects

### ProxyFL-Prune

*Python, PyTorch, Opacus, Hugging Face*

- Integrated structured and unstructured pruning into a decentralized federated learning framework, reducing model size by 40% while preserving differential privacy guarantees.

### Glaucoma Detection via CNNs

*TensorFlow, Keras, ResNet50, DenseNet, MobileNet*

- Benchmarked three CNN architectures for retinal image classification using transfer learning, achieving 94%+ accuracy on medical imaging datasets.

## Education

**University of Georgia**, Athens, GA

M.S. in Computer Science — GPA: 3.7/4.0 (Aug 2023 – May 2025)

**SRM University**, Amaravathi, India

B.Tech in Computer Science, Data Science — GPA: 8.3/10 (Jul 2018 – May 2022)

## Publications

Mishra et al. (incl. Peddi, S.), 2022. *Crop Recommendation System Using SVM*. In Advances in Distributed Computing and Machine Learning (pp. 501–510). Springer, Singapore.
